

Existing Customers & Success Story

Customer pain point

- ▶ To achieve global standard convention centre status by replacing 15 years old non-high definition CCTV to high definition (hd)
- ▶ Most of the existing CCTV are not working properly and has limited surveillance coverage
- ▶ To plan how to upgrade from non-high definition CCTV to high definition (hd) without hacking or do major cabling in order to avoid operational down time and to reduce cost

Solutions

- ▶ Planned, commissioned, and upgrade 275 units analog CCTV camera to high definition Hybrid analog IP-CCTV
- ▶ Upgrade and optimize IP networking structure for CCTV Monitoring System
- ▶ Installed and commissioned 25 units additional PTZ IP HD
- ▶ Burst network speed, optimize bandwidth allocation and betterment of firewall management by group bandwidth segregation and aggregation
- ▶ Provide support services
